The University of Texas, Dallas - Innovation Lab

The UT Design Studio provides students and corporate partners a place to create, innovate, design, build and learn. This innovation lab is fully furnished with maple butcher block top workbenches by Formaspace. These workbenches provide more than 30,000 square feet of dedicated space with a room for 56 project stations.

The University of Texas, Dallas - Innovation Lab

The UT Design Studio provides students and corporate partners a place to create, innovate, design, build and learn. This innovation lab is fully furnished with maple butcher block top workbenches by Formaspace. These workbenches provide more than 30,000 square feet of dedicated space with a room for 56 project stations.

Harvard University - Graduate School of Design

Higher Education

Formaspace delivered a tailored solution to enhance the Harvard Graduate School of Design's studio environment, addressing challenges stemming from flawed previous installations. Our team provided over 450 customized products within a tight 3-week installation timeframe, including work desks, divider panels, and secure storage carts. By implementing fully welded connections, leveling feet, and on-site modifications, we ensured durability and functionality while correcting issues caused by seasonal climate changes and uneven floors. The result is an inviting and collaborative workspace that promotes creativity and innovation among students, featuring heavy-duty finishes, integrated storage solutions, and reinforced divider panels for improved aesthetics and practicality.

Harvard University - Graduate School of Design

Higher Education

Shelving for Art Students

Double-sided shelving units equipped with leveling casters enable art students to safely organize large-format print documents and projects on an island featuring deep storage shelves.

Skyline College – The Fab Lab

The Fab Lab is a production workshop and small-scale innovation hub equipped with digital fabrication machines and technologies for creating objects, tools, and electronics. Formaspace designed and built custom height-adjustable phenolic top workbenches to provide mobility and ergonomics for students studying in the Fab Lab.

Confidential Client – The Cryogenics Lab

University students conduct experiments on low-temperature preservation in the Cryogenics Lab. This custom lab project features wall-mounted glass-front cabinets, lockable drawers on mobile Benchmarx workstations for each student, drawer storage, fume hoods, and an epoxy sink.

University of San Diego – School of Medical

Higher Education

Formaspace designed and manufactured this workbench, featuring a chemical-resistant top and an integrated epoxy sink, specifically for research laboratories at UC San Diego's School of Medicine. This wet lab configuration is commonly used and applicable to various educational and healthcare facilities.

Pasadena City College – Administration Office

Higher Education

Confidential Client - Heavy Duty Repair Classroom

Higher Education

College tech students use Formaspace Basix™ workbenches for repairing heavy-duty machinery. These desks, featuring attached power outlets and a lower shelf, support a weight capacity of up to 1500 lbs.

Central Tech College – Career & Technology Education Center

Central Technology Center, located in Sapulpa, Oklahoma, is a public career and technology education center within the Oklahoma Department of Career and Technology Education system. Emphasizing hands-on learning, they provide students with opportunities for innovation, creativity, vision, and dedication to expand their learning and career prospects. Formaspace designs included desk-height power in touch-down desking applications and casters for open-plan tables, enhancing mobility for easy reconfiguration, making these spaces multipurpose.

Texas A & M

Higher Education

Brophy College Preparatory – Innovation Commons (Phenoix, AZ)

Brophy College Preparatory, a high school in Arizona, has been committed to providing rigorous academics, innovative technology, outreach and service, and opportunities for personal reflection through retreats since its establishment in 1928. Formaspace has equipped their library and innovation commons with a diverse range of workbench applications

Thaden School

Thaden School, located in downtown Bentonville, Arkansas, is an independent high school renowned for its innovative approach to education. The school's 30-acre campus, including its master plan, buildings, and landscape, is the result of the Design Excellence Program, led by acclaimed architects Eskew+Dumez+Ripple of New Orleans and Marlon Blackwell Architects of Fayetteville, Arkansas. Formaspace contributed to the school's aesthetic by designing and manufacturing several multipurpose tables featuring industrial welded steel frames and butcher block tops, embodying the warm yet industrial aesthetic for which Formaspace is renowned.

Higher Education

Cornell University dHIVE – Design Hub for Innovation, Visualization, and Exploration

This modern installation at Cornell University's dHIVE space was crafted for innovation and exploration in design. The open-concept layout features long workstations with maple butcher block worksurfaces, complemented by upper storage shelving.

Animal Lab for Education

Cornell University dHIVE – Design Hub for Innovation, Visualization, and Exploration

The sturdy metal frames are finished in a white semigloss powder coat on casters, ensuring mobility and durability. The clean, minimalist design promotes both collaborative and individual work, making it an ideal solution for higher education environments that value both style and functionality.

Animal Lab for Education Institute – New Jersey

Higher Education

This animal lab, designed for an educational institute in New Jersey, offers specialized enclosed areas to maintain a stable environment for animal and plant observation, as well as scientific research. The lab is outfitted with durable upper and lower casework finished in an Almond powder coat, paired with sleek, chemical-resistant graphite phenolic resin countertops.

Animal Lab for Education Institute – New Jersey

Higher Education

Center Benchmarx tables, powder coated in sapphire blue, are also topped with matching phenolic surfaces, creating a cohesive and modern aesthetic while ensuring optimal functionality. Durable and built to last, this lab is equipped to support research for years to come.

Archbishop Mitty High School – Science Lab

Primary & Secondary Education

Confidential Client - Chemistry Lab

Primary & Secondary Education

The newly renovated high school laboratory is furnished with 11 mobile Basix™ island benches. Each bench has a frame powder-coated in clear gloss and topped with a black, chemical-resistant epoxy worksurface.

Maker Spaces

Arizona Science Center – Science Museum

Maker Spaces

Arizona Science Center stands as a premier destination for science and education nationwide, providing hands-on learning exhibits and programs for children, adults, and educators alike. Formaspace has custom-designed hardwood top workstations and tables in various sizes to enhance hands-on learning experiences at their makerspace, Create.

The Peoria Playhouse - Children Museum

The Peoria Playhouse Children's Museum offers interactive exhibits and play areas centered around art, science, and music, fostering exploration and creativity in young minds. Formaspace constructed small green workbenches to facilitate hands-on experiences, showcasing the innovative solutions they bring to education centers for children and adults alike.
